

## PL3000 Light Weight, Industrial Aluminium Version

The Aluminium PL3000 has been design to allow a high capacity platform to be easily moved by one person (approximately 11kg for a 600mm x 900mm Scale Base) but still be as strong as the standard industrial platforms. Custom sizes are welcome as Associated Scale Services is the manufacturer

- System with trade approval
- The standard system is 300kg with a division size of 0.2kg.
- Standard System uses 4 x 500kg load cells to reduce the likely hood of failure through rough use and overloading.
- Light Weight. Approximately 21kg total and lifting the platform for wheeling purposes is approximately 11kg.
- Channelled construction for strength and to protect cables to the junction box.
- The foot construction is a solid polyurethane base for reduced wear and increased strength.
- Warranty for the Aluminium PL3000 is 12 months from delivery.

- **Calibration capacity up to 1000kg**
- **Customizable Size (Photos above are of a 600mm x 900mm)**
- **Construction: Aluminium frame top plate**
- **Trade Approved**
