Australian Designed and Manufactured for the Weighing Industry

Axle Weighing (Pitted)

For Single Axle or Axle Clusters

Associated Scale Services Pty Ltd has been manufactures weighing equipment for the past 17years for the Australian, Australasian and the Asian region from Brisbane, Queensland Australia.

As the manufacturer of weigh bridges, sizes and capacities are to the customers requirements to ensure full flexibility in incorporating the system into the true application. Discussions on what is required is essential to ensure the installed system is appropriate to weigh the vehicles in the manner that is requested. These consultations are through an experienced sales people who has many years of experience in both the sales and applications.

Fully Pitted Axle Cluster Weighbridge - Note: custom sizes available
