ASOB 25kg Valve Bag Batching System

The ASOB bagging system is designed primarily for filling open mouth type bags. The system is gravity controlled utilizing a fully programmable industrial weight controller to ensure not only a quick bag fill but with high accuracy. The ASOB is manufactured in Australia by Associated Scale Services Pty Ltd.

- The ASOB has a simple operator interface for both inputting data and to explain where the stage of the process.
- Fully stainless construction on all components that touch the product to prevent contamination.
- GSE 465 controller controls the frequency of the speed with respect to the filling stages well as jogging for hi accuracy

- Capacity 25kg (can be designed around other capacities)
- Material
 - Stainless Steel for items that touch product
 - Mild Steel for all other. (can be completely stainless steel as seen in the above picture)
- Option for Load Cells are
 - Custom design specifically for this operation (floating system)
- Power
 - Single Phase 240VAC
 - Compressed Air Required
- Bagging Speed 20-45seconds depending on required accuracy
