

The scales can be folded for easy transport.

Integrated ramp folds up for trouble-free transport.

seca 676

Electronic wheelchair scales
with handrail and transport castors

Stable, functional and mobile: thanks to its large platform and sturdy handrail, the seca 676 is very versatile. Patients can be weighed while sitting in a wheelchair or on a chair. The handrail provides valuable support for people who are frail or can walk only with great difficulty. Its high capacity makes the seca 676 ideal for weighing very heavy persons. The scale can be folded together after use in no time at all to save space. The sturdy locking device between rail and platform ensures that the seca 676 stands safely even when folded together. The handrail also serves as handle when the scale is folded together, allowing the scale to be moved around or stowed away effortlessly and quickly on its transport castors. Weighing is simple and user-friendly with the clearly designed, intuitively operable display at hip level and with the additional functions of TARE, HOLD and BMI.

- Capacity: 360 kg
- Graduation: 100 g
- Functions: pre-TARE with 3 memory cells for the additional weight, TARE, HOLD, BMI, damping system, kg/lbs/sts switch-over
- Optional: RS232 interface seca 460
