

Thanks to its outstanding precision, this scale is especially suited for use in intensive care.

The damping function delivers precise measurements even if the baby moves.

Can be operated by battery or mains adapter.

Electronic baby scales with integrated RS232 interface

A special integrated damping system together with the HOLD function for quick, precise weighing even if the baby is restless. The ergonomically shaped tray with high rounded sides makes it easy to weigh larger babies. The large, bright LED figures make it easy and convenient to read the result. Power supply is by mains adapter or rechargeable batteries. An integrated RS232 interface guarantees the reliable transmission of data to a PC.
