ASAL Weighing Modules

Designed with the ANYLOAD 276EH compression load cell, the ASAL allows a low cost solution to weigh pre-existing or new structures like tanks, silos or just about anything with accuracy and precision

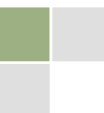

Picture of ASAL Weigh Module with 50t 276EH load cell
Weighing Module designed and manufactured in Australia by Associated Scale Services

ASAL – ZINC PLATED
(with 25t 276EH shear beam)

The mount is completely manufactured (including all milling) in the Associated Scale Services, Wacol factory

Unlike lower cost versions the ASAL uses a hardened cup and dome arrangement to allow for the load cells to bend correctly

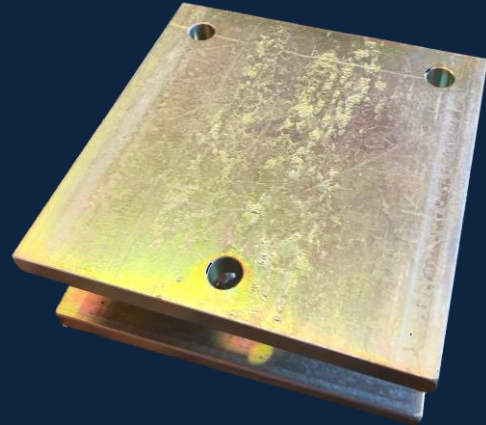

The ASAL Up Lift Support has been tested to 20t.
Note this was a single support where the ASAL has been designed with 2 of supports

ASAM Weighing Module

Model	Capacity	Material
ASAL-25t	Load Cell: 276EH-25t Length : 300mm Width : 200mm Height: 114mm	Mild Steel – Zinc Plated
ASAL-50t	Load Cell: 276EH-50t Length : 350mm Width : 250mm Height: 128mm	Mild Steel – Zinc Plated

Shown on this photo is a customers request to have pre existing hole centers of the base of the structural leg. Hence only 3 mounting holes

Note: This range of modules has been designed as an economic solution to weighing pre-existing structures or for new and OEM requirements.

MOUNTS AND LOAD CELLS SOLD SEPARATELY
