

## Drum Weighing (for pallet racking)

The drum weighing system was designed for dispensing product from the vessel while on pallet racking. A simple process that allows the drum weight to be tared back to zero and the quantity of product to be shown once dispensed. At any time the full drum weight can be easily seen.

- System is designed around the 12 volt indicator for safety
- Single piece construction for ease of service and maintenance
- Easily assembled onto the pallet racking with the indicator mounted with quick release plugs
- Warranty for the Drum Weighing System is 12 months from delivery.

- **Standard Size** – to a standard 205l drum
  - Customizing versions welcome
- **Top Plate** – mounted with safety rails
- **Options for material for platform are**
  - **Mild Steel (Standard)**
    - Painted (Standard)
    - Galvanized
  - **Stainless Steel**
- **Option for Load Cells**
  - Specified on order
