## PL3000U Scale Frame

The PL3000U Scale Frame is designed for weighing of items via a pallet jack that can be lowered onto the outer shoulders of the frame. This is used where the items being weighed are the same size. NO ramps required.

Easy installation and operation

- Guides are bolted to the floor allowing for easy alignment of the item being weighed.

The Standard System is 200kg with a division size of 1kg.

The PL3000U is perfect for the sites where the items being weighed are the same size and are able to be lowered without restriction by the pallet jack.

Comes with Solid Foot construction for reduced wear.
